

جامعة الملك عبد الله
للعلوم والتقنية
King Abdullah University of
Science and Technology

July 1, 2024

To whom this letter may concern,

at King Abdullah University of Science and Technology, I am currently teaching and managing a research laboratory devoted to robotics and automation. Prior to that appointment, I have been on the tenured faculty of the Georgia Institute of Technology and the Massachusetts Institute of Technology.

I am writing to confirm that Mr. Eder Baron Prada was a valuable member of our research team at King Abdullah University of Science and Technology (KAUST) from January 2019 to November 2021. During this period, Mr Baron Prada held the position of PhD Student.

I met Mr. Baron-Prada when I arrived at KAUST during the Fall term of 2019. However, I got to know him far better after the departure of his PhD advisor, Professor Jeff Shamma. In this role, he was responsible for a variety of tasks including:

- Conducting advanced research in the field of control, power systems and power electronics.
- Collaborating with fellow researchers and participating in academic discussions and seminars.
- Assisting in the preparation of research papers and presentations.

Eder Baron dedication to this role was exclusive and full-time, with a commitment of approximately 40 hours per week.

If you require any further information, please feel free to contact me at eric.feron@kaust.edu.sa.

Sincerely,

Eric Feron
Director of the Robotics, Intelligent Systems, and Control (RISC) Laboratory
Electrical and Computer Engineering Department
King Abdullah University of Science and Technology
