

Palgrave Studies in Democracy, Innovation, and Entrepreneurship for Growth

Series Editor

Elias G. Carayannis, The George Washington University, Washington,
DC, USA

The central theme of this series is to explore why some areas grow and others stagnate, and to measure the effects and implications in a trans-disciplinary context that takes both historical evolution and geographical location into account. In other words, when, how and why does the nature and dynamics of a political regime inform and shape the drivers of growth and especially innovation and entrepreneurship? In this socio-economic and socio-technical context, how could we best achieve growth, financially and environmentally?

This series aims to address such issues as:

- How does technological advance occur, and what are the strategic processes and institutions involved?
- How are new businesses created? To what extent is intellectual property protected?
- Which cultural characteristics serve to promote or impede innovation? In what ways is wealth distributed or concentrated?

These are among the key questions framing policy and strategic decision-making at firm, industry, national, and regional levels.

A primary feature of the series is to consider the dynamics of innovation and entrepreneurship in the context of globalization, with particular respect to emerging markets, such as China, India, Russia, and Latin America. (For example, what are the implications of China's rapid transition from providing low-cost manufacturing and services to becoming an innovation powerhouse? How do the perspectives of history and geography explain this phenomenon?)

Contributions from researchers in a wide variety of fields will connect and relate the relationships and inter-dependencies among (1) Innovation, (2) Political Regime, and (3) Economic and Social Development. We will consider whether innovation is demonstrated differently across sectors (e.g., health, education, technology) and disciplines (e.g., social sciences, physical sciences), with an emphasis on discovering emerging patterns, factors, triggers, catalysts, and accelerators to innovation, and their impact on future research, practice, and policy.

This series will delve into what are the sustainable and sufficient growth mechanisms for the foreseeable future for developed, knowledge-based economies and societies (such as the EU and the US) in the context of multiple, concurrent and inter-connected "tipping-point" effects with short (MENA) as well as long (China, India) term effects from a geo-strategic, geo-economic, geo-political and geo-technological set of perspectives.

This conceptualization lies at the heart of the series, and offers to explore the correlation between democracy, innovation and growth.

NOTES ON CONTRIBUTORS

Carlos Aguirre-Bastos works at the Science and Technology Management, Secretaría Nacional de Ciencia, Tecnología e Innovación. Carlos does research in Qualitative and Multi-method Research, Public Policy and Information Technology and Politics. Their current project is ‘Science and Innovation for Inclusive Development’.

Ernesto Andrade-Sastoque is Ph.D. Candidate based at the Science, Technology and Policy Studies Department of the University of Twente, The Netherlands. Graduated as M.Sc. in Interdisciplinary Development Studies, B.Sc. in Anthropology and minor in Law. More than ten years working on extractive activities and STS. Recently working on sociotechnical imaginaries and innovation governance with a focus on social and environmental transformations.

Sergio Sosa Bautista is Economist of the University of Ibagué, Junior Researcher, YMCA Volunteer, and Current Student in the Bootcamp Programáte to be a full-stack developer.

Helga Patricia Bermeo-Andrade is Industrial Engineer with a Ph.D. in Engineering and Innovation Projects. Lecturer at the University of Ibagué and Senior Researcher in Colciencias’ Scienti System (Colombia). Topics of study: Technology and innovation management, Logistics and Supply chain management.

Isabel Bortagaray sociologist holds a Ph.D. in Public Policy, with a focus on Science, Technology and Innovation Policy from the Georgia Institute of Technology. Professor at the University of the Republic in Uruguay. Honorary Research Fellow at the Center for Science, Technology and Innovation Indicators (CeSTII), of the Human Sciences Research Council of South Africa.

Juan Gonzalo Castellanos M is Electronics Engineer—Universidad Eco. José de Caldas-Bogotá. DHSS Health Technology Specialist London-England. Executive Director of the Andean Foundation for Technological and Social Development TECNOS. Consultant-coordinator of studies on regional development based on knowledge (Regional Authorities in Colombia). Consultant-coordinator of studies on technological development sectors: agroindustry, manufacturing and services (MADR-MICT-MINTIC). Field manager and representative in Colombia for the consulting company Pluralité-Canada. UNIDO Expert National Program: Capital Goods Colombia. Colciencias Advisor, Industrial Technological Development and Quality: Electronics-Telecommunications—Informatics. Program Consultant expert United Nations, Physical Resources in Health WHO-PAHO—El Salvador—Central America. Postgraduate professor, Universidad Javeriana: Institutionalism and STI policy. EAN University graduate professor: Innovation in SMEs, Technology Transfer. Researcher at the Autonomous University of Colombia: Innovation and Productivity EAN University Researcher: Innovation in Business Models.

Juan Pablo Centeno is Master in Government and Public Policy, bachelor degree in Government and International Relations. Researcher on science, technology and innovation policy and governance at Centro de Investigaciones y Proyectos Especiales—CIPE, Externado de Colombia University, Bogotá (Colombia).

Rodrigo A. Cevallos is Ph.D. Student in Economics and Management (Universidad Autónoma de Madrid—UAM), Master in Social Sciences specialisation in Sociology (Universidad de Chile), Licentiate in Economic and Managerial Sciences minor in Political Science (Pontificia Universidad Católica de Chile). Practitioner, researcher and consultant in science, technology and innovation management and policy.

Janaina Pamplona da Costa is an Assistant Professor/Lecturer at the Department of Science and Technology Policy (DPCT), State University of Campinas (UNICAMP), Brazil. Ph.D. in Science and Policy Technology Studies at SPRU/University of Sussex, UK.

Eliana Ángela Fernández is a Ph.D. Candidate from CONICET at the University of Buenos Aires, Argentina. She is an industrial engineer who works as a researcher at CEUR (Centro de Estudios Urbanos y Regionales). At present, she studies the dynamics of technological change and economic geography in electronics and aerospace industries.

Javier García-Estévez is an Associate Professor in planning and territorial development at the Interdisciplinary Centre of Development Studies at the University of Los Andes, Colombia. Economist from the Industrial University of Santander (Colombia) and Ms and Ph.D. in economics from the University of Barcelona (Spain). He is member of the Transformative Innovation Policy Consortium led by the University of Sussex's Science Policy Research (SPRU) and contributes to the 'Regional Development Index—Latin America' Project, in collaboration with researchers from the Autonomous University of Chile, the Inter-American Development Bank and the University of the Republic of Uruguay.

Laura Uribe Gómez is Professional in Government and International Relations, Externado University. Sector analyst for education, assess the indicators performance and monitor the implementation of the Peace Agreements and Sustainable Development Goals at the National Planning Department.

Andrés Gómez-Leon is Economist and Master's Degree in Economics with emphasis in public management from the National University of Colombia. 17 years of university experience in teaching, research, consulting and administrative management in universities in the country. Evaluator and member of editorial committees of national journals. Advisor to ICFES Colombian institute for the promotion of higher education as a peer evaluator of the economic analysis module of the Saber PRO test in economics and consultant to the IDB Inter-American Development Bank on issues of social innovation. His research focused on sports economics, economics of happiness, economics and cinema, job satisfaction, social innovation in Latin America, macroeconomics and public finance, microeconomics and consumer behaviour, labour market,

the field and training of economists, economics education for non-economists, social security in Colombia, new political economy and job satisfaction. Coordinator of the presentation of qualified registrations and accreditation of economics programs before the MEN. Member of the Board of Directors of the Association of Economists of the National University. Professor, researcher and advisor at the CUN, EAN and Rosario universities in Bogotá Colombia.

Iván D. Hernández is Professor and Researcher at the University of Ibagué, Colombia. Economist, with two Master's degrees in Economics from the National University of Colombia and Warwick University in the United Kingdom (UK), and a Ph.D. in Economics of Innovation from the University of Manchester, UK.

Carlos Merino Moreno is Ph.D. in Business Organization (Universidad Autónoma de Madrid—UAM), Business Management Degree and Economic and Managerial Sciences Diploma (Universidad Carlos III de Madrid), Professor in Business Administration at UAM, MBA Coordinator (UAM), Senior Consultant ICA2 Innovación y Tecnología, Research lines about intangible assets, knowledge management, innovation and strategic management.

Iván Montenegro-Trujillo is Industrial Engineer, Magister in Political Science. Senior Consultant and Researcher in public policy of science, technology and innovation, and of productive development and competitiveness formulation, governance, institutionality, impact evaluation, smart specialisation and integration between science and innovation agendas and productive development, International Technological Cooperation and Intellectual property.

Gonzalo Ordóñez-Matamoros is Ph.D. in Public Policy of the Georgia Institute of Technology and the Georgia State University, USA. Assistant Professor at the Faculty of Behavioural, Management and Social Sciences at the University of Twente, The Netherlands, and Director of the Centro de Investigaciones y Proyectos Especiales—CIPE at the Faculty of Finance, Government and International Relations at the Universidad Externado de Colombia in Bogotá.

Luis Antonio Orozco is Ph.D. in management at Universidad de los Andes and Business Administrator at Pontificia Universidad Javeriana.

Full Professor and Researcher at School of Management at Universidad Externado de Colombia and Senior Researcher at Colombian Ministry of Science, Technology and Innovation. Member at the editorial board of the *Journal of Management History* and member at the Scientific Committee at the International Society of Scientometrics and Informetrics.

Mario A. Pinzón-Camargo is graduated as M.A. in Public Policy of the Universidad Nacional de Colombia (UN) and M.A. in Economics and Law of the Universidad Externado de Colombia (UEC). He is Titular Professor at Universidad Externado de Colombia and Ph.D. candidate at Twente University, The Netherlands.

Nicolás Garzón Rodríguez is Master student in Science and Technology Policy, State University of Campinas (UNICAMP), Brazil. Researcher of Laboratory in Public Policy, Geography of Innovation and Governance (LABGOING) at UNICAMP.

Jaime Humberto Sierra-González is an Associate Professor at the Business Department, School of Business and Economics—Pontificia Universidad Javeriana (Col). Ph.D. in Business and Management, The University of Manchester (UK); Master in Economics of the Internationalisation of Business and Finance, Università di Roma “Tor Vergata”, Rome (Ita); Master in Economics, Pontificia Universidad Javeriana; Diploma in International Relations, Academia Diplomática (Col); BA in Education, Universidad Distrital (Col). Professor at the Master in Economics, Master in Strategy, Innovation and Competitiveness, Diploma in Technology Management and the Diploma in Management of Social and Solidarity Enterprises at PUJ.

Gustavo Valdivieso is Ph.D. (c) Governance of Science, Technology and Innovation, University of Twente (the Netherlands). Ph.D. (c) Political Studies, Universidad Externado de Colombia (Colombia). Advanced Project Manager, Stanford University-IPS (USA). M.A Government and Public Policy, Universidad Externado de Colombia.
