

March 24, 2026

To Whom It May Concern,

This letter confirms that Dr. Juan Sebastián Hernández Suárez successfully held the position of Visiting Scholar at Michigan State University, within the Department of Biosystems and Agricultural Engineering.

The appointment was carried out from September 1, 2021, to December 31, 2021.

During this period, Dr. Hernández Suárez was engaged in research and academic activities focused on water resources and environmental engineering. His responsibilities included:

- Conducting research on remote sensing applications for water resources management
- Utilizing advanced modeling tools and datasets to support environmental decision-making
- Developing analytical methodologies for hydrological and environmental systems
- Contributing to scientific publications in peer-reviewed journals
- Collaborating with faculty and research teams on interdisciplinary projects

He worked at 80% time (32 hours per week) and demonstrated strong analytical skills, research capability, and dedication to academic excellence.

Dr. Hernández Suárez's contributions supported the department's research objectives and enhanced the application of innovative technologies in water resource engineering.

Sincerely,

**Department of
Biosystems and
Agricultural
Engineering**
