Abstract

Venezuelans in an irregular migratory situation in Bogota must perform informal work that allows them to survive with their families. For this reason, this article presents a study of informal recyclers in Barrio La Concepción, through the method of problem solving and the implementation of surveys and observations in this neighborhood during January to May 2022. It was showed that informal recyclers are unaware of the migration regularization process to access the Temporary Protection Permit, as well as the labor formalization process to be registered as formal recyclers in the RURO. This lack of knowledge and the lack of state aid violate their fundamental rights and accentuate their unsatisfied basic needs.
