CERTIFICATE

I undersigned, Prof. Jean-Luc Bertrand-Krajewski, head of the laboratory DEEP at INSA Lyon, certify that Dr. Santiago Sandoval co-supervised with me the following five MSc students at INSA Lyon, Civil Engineering and Urban Planning, during their MSc research projects (second year of the MSc cursus):

Lauriane BEAUVISAGE

Nov. 2018-June 2019, MSc research topic:

Long term simulation of various scenarios of urban stormwater source control (vegetated roofs, trenches, swales, etc.) for different climatic regimes.

Co-supervision by Santiago Sandoval: 50 %.

Milena KOHL and Olivier HUGUES

Nov. 2016-June 2017, MSc research topic:

Improving the models of urban wet weather pollutant loads

Co-supervision by Santiago Sandoval: 80 %.

Valentin TERRIER and Luis TORRAS

Nov. 2014- June 2015, MSc research topic:

Automated measurement of particle settling velocities in urban wet weather discharges : definition of a new protocol based on turbidity measurement.

Co-supervision by Santiago Sandoval: 50 %.

Villeurbanne, on 12 September 2019.
